Bachelor

Introduction

Web Developer with a foundation in modern web technologies and experience in both academic and professional environments. As a Junior Web Developer at Surigao Del Norte State University, efficiently developed and debugged CRUD-based APIs using Laravel, enhancing data retrieval processes and ensuring seamless integration between front-end and back-end technologies. Proficient in building dynamic user interfaces with Vue.js and React.js, significantly improving user engagement and application usability. Skilled in managing databases and implementing authentication processes for secure and scalable web applications. Holds a Bachelor of Science in Information Systems, providing a robust understanding of information technology principles. Complemented by experience as a teacher, effectively communicating complex concepts and fostering critical thinking in students. Seeking to leverage my technical skills and passion for innovative web application development within a collaborative and fast-paced team environment.

Career Objective

Desired Job Title Web Developer

Desired Job Type Part-time

Desired Industry Information & Communication Technology

Availability Immediate

Desired City Surigao del Norte

Work Experience

Aug 2025 - Present Teacher Surigao Del Norte State University

Delivered lectures on web programming and related specialized topics, sharing practical, industry-based knowledge with students. Prepared instructional materials on web development concepts and technologies, aligned with course objectives and academic standards. Facilitated discussions to encourage critical thinking and student engagement in web programming topics. Assisted in evaluating student performance through coding activities, projects, and assessments. Collaborated with faculty members to support academic programs and learning outcomes in web development and programming courses.

Jan 2025 - Apr 2025 JUNIOR WEB DEVELOPER Surigao Del Norte State University - ICT Office

Developed and debugged CRUD-based APIs using Laravel, improving data retrieval efficiency. Facilitated seamless integration between front-end and back-end technologies through effective database management. Executed API requests and implemented robust authentication, streamlining data management processes. Built interactive user interfaces with Vue.js and React.js, enhancing user engagement, and increasing application usability. Expanded problem-solving capabilities and gained comprehensive insights into web application development.
